## GKB consolidated accounts 2018: the Bank remains on course for growth.

Graubündner Kantonalbank (GKB) once again posted strong growth. With a net profit before reserves of CHF 198.0 million, it achieved another record result in 2018. This growth was driven by the excellent performance of the sales force and the first-time full consolidation of Albin Kistler AG. Privatbank Bellerive AG also posted a record operating result.

Using future scenarios as a basis, GKB is constantly adjusting its strategic focus. Consequently, the Bank's diversification strategy concentrating on the expansion of its investment and asset management business had a positive impact on the result achieved in 2018. GKB posted encouraging growth for all business areas, confirming its position as market leader in Graubünden. At the same time, GKB invested strongly and successfully in innovation projects.

## Net interest income: omission of hedging costs compensates for burden of negative interest rates

In spite of lower reversals of value adjustments, earnings from interest-related business (CHF 259.4 million) rose by 2.0% (CHF +5.1 million). Gross interest earnings rose by 2.7%. Growth in loans to clients could no longer compensate for the additional burden of negative interest rates. At 0.2%, the ratio of non-performing loans is still very low in historic terms.

## Commission and trading business: strong growth due to Albin Kistler AG

Net fee and commission income improved by 13.7% to CHF 106.5 million (CHF +12.8 million). The first-time full consolidation of Albin Kistler AG made a substantial contribution to the increase in fee and commission income. The strategic initiatives relating to the parent company's investment business also had a positive impact. Investment volume rose substantially and earnings intensity was maintained at a high level. With this annual result, the Bank moved closer to its strategic objective of generating 30% of its earnings from commission income. This ratio improved to 27.7% in the reporting year (previous year: 25.1%).

## Other earnings: capital markets weigh on result

Equity market performance weighed on other ordinary earnings (CHF -6.9 million / -47.2%). Securities investments posted a loss of CHF 1.1 million compared to a positive contribution to performance of CHF 3.3 million in the previous year. Income from investments in other companies (CHF -1.4 million compared to the previous year) includes the higher dividend paid by the Aduno Group and the reduced income from the valuation of Albin Kistler AG at equity (full consolidation from 1 July 2018).

## Operating expenses: productivity is still very good

Operating expenses including payment for the state guarantee increased by 5.6% or CHF 9.5 million year-on-year. The full consolidation of Albin Kistler AG accounts for CHF 6.1 million of this increase. The remaining cost increase relates to investments in future projects. The cost/income ratio I (without depreciation) was 46.7%. At 49.9% (previous year: 48.5%), the cost/income ratio II is still below 50%.

## Operating result: CHF 196.1 million / +0.4 percent

The operating result (CHF 196.1 million) as a measurement of operational performance improved once again ( $\pm$ 0.4%). This very encouraging development is explained by the growth posted for the most important sources of income and the reduction in risk positions. The result was burdened by a net goodwill write-down of CHF -10.2 million on the controlling interest in Albin Kistler AG (previous year: CHF -1.0 million).

## Consolidated profit: CHF 185.1 million / +2.7 percent

Thanks to the strong operating performance, reported consolidated profit rose to CHF 185.1 million. The bank used the dedicated bank reserves for future investments to finance expenditure of CHF 3.7 million for the Digital Banking 2020 project.

### Loans to clients: strong growth of 3.5 percent

Loans to clients increased by 3.5%. First-class mortgages granted to clients in other cantons once again contributed to this above-average growth. More than half of the growth in mortgage loans (+4.2%) was generated in other cantons. This growth overcomes the boundaries of the home market and makes a contribution to diversification.

#### Client assets: increase of CHF 3.5 billion to CHF 33.2 billion

Client assets of CHF 33.2 billion (+11.9% / CHF +3.5 billion) were boosted by the full consolidation of Albin Kistler AG from 1 July 2018 (+CHF 4.1 billion) and net new money of CHF +0.92 billion. On the other hand, the negative equity market performance in the fourth quarter hurt client assets (CHF -1.4 billion).

## Equity base: excellent core capital ratio of 18.8 percent

GKB's goal is to positively differentiate itself in the market by its above-average equity base. The weighted capital ratio (CET 1 ratio) is 18.8% and consists entirely of hard core capital. Compared to the ratio of 12.8% required by the supervisory authorities, the Bank therefore has substantial capital reserves.

## Distribution: dividend of CHF 40.00

The excellent result allows the Bank to hold the dividend payment at CHF 40.00. A total dividend of CHF 100.0 million will be paid to the Canton of Graubünden and the participation capital holders. The Canton of Graubünden will receive CHF 87.4 million (including payment for the state guarantee), an increase of CHF +0.1 million on the previous year. CHF 3.2 million will be allocated again to the contributory fund for non-commercial cultural, charitable, sport, business, tourism and social projects.

## Outlook for 2019

It can be assumed that net interest income will decline due to persistently negative interest rates. The profit trend does not assume any further reduction in risk positions, and in a stable stock market environment a profit of CHF 175 to 180 million can be expected. On the client side of the business GKB is expecting growth of some CHF 350 million in loans to clients in 2019, and an inflow of some CHF 500 million in new money.

Chur, 8 February 2019
