Half-Year and Management Report – Graubündner Kantonalbank increases Group profit.

Alois Vinzens CEO

Peter Fanconi Chairman

Strong growth in loans to clients.

Sound mortgage growth is being supported by the brokerage of real estate financing. This business has a positive influence on the average loan-to-value ratio while broadening risk diversification.

Client assets: performance and adjustments weigh on results.

Client assets declined to CHF 29.4 billion (-2.5%) as a result of losses in value and outflows. The negative performance is primarily attributable to currency effects. Net outflows of CHF 310.2 million related to the adjustment of cross-border business.

Negative money market rates dent interest income.

The 5.2% decline in net interest income can be ascribed to the negative interest rate policy of the Swiss National Bank, which gave rise to higher hedging costs. Hedging costs on short- and medium-term positions are having an impact on the current year in particular.

Commission business undergoing adjustment.

Net fee and commission income declined by 9.8% to CHF 52.2 million. Reduced income from retrocessions and the fall in client deposits as a result of the adjustment of cross-border business are weighing on results. The higher share of asset management mandates generated additional income.

Graubündner Kantonalbank posted a 1.7% increase in Group profit in the first half of 2015 over the same period last year. The lending and mortgage business reported a solid performance. Operating income suffered from the decline in interest business. The risk profile of the loan portfolio had a positive effect. Expectations for the full financial year 2015 have been raised from the forecast made in February.

Trading business higher.

Net trading income (CHF +2.9 million / +31.3%) reflects the increase in foreign currency transactions in client business. Other income (CHF -1.7 million/-21.6%) includes major gains on the disposal of financial assets in the previous year.

Operating expense under control.

Current costs were reduced over the previous year. The +0.2% (CHF 0.14 million) rise in operating expense is attributable to investments in new and innovative products and processes in the investment business. Lower income pushed up the cost/income ratio II to 48.8% (previous year: 46.4%). Productivity remains relatively high, however.

Positive trend in allowances.

The development of value adjustments for credit risks has so far given no indication of an increase in credit risk exposure. This is because businesses in the construction and tourism sectors are adjusting to lower demand, so only a few defaults are expected.

Expected completion of the US tax programme process.

Graubündner Kantonalbank is participating in Category 2 of the US tax programme. The parent company is expected to complete the process in autumn.

Gain on disposal of Swisscanto units earmarked for future projects.

In the first half of 2015, Graubündner Kantonalbank realised a gain of CHF 16.8 million on the disposal of its Swisscanto holding. The gain is being transferred to the reserves for general banking risks and will be used for investments in major projects.

Group profit up slightly.

Group profit was up slightly to CHF 90 million. Net profit before allocations to reserves and after deductions for minority interests increased by 7.7%.

Above-average capital base.

GKB reported shareholders' equity (including minority interests) of CHF 2,311 million for the first half of 2015. With a core capital ratio (CET 1) of 18.6%, it is one of the best-capitalised banks in Switzerland.

Improved expectations.

Given the first half of the year, the outlook for 2015 has improved markedly over what we communicated in February. Expected net profit is being revised upwards by approximately CHF 10 million to CHF 170 to CHF 180 million. Group profit is expected to total CHF 160 to CHF 165 million, which is at the previous year's level. Earnings per share is likely to be between CHF 70 and CHF 72, with the dividend unchanged at CHF 38.

Information on the summarised notes.

Extraordinary income and expense.

In addition to the aforementioned gains on the disposal of Swisscanto units (CHF 16.8 million), extraordinary income (CHF 17.2 million) in the first half of 2015 was positively influenced by gains on the disposal of own real estate (CHF 0.4 million). Extraordinary expense (CHF 16.9 million) primarily includes the aforementioned creation of reserves for general banking risks (CHF 16.8 million).

Changes in the accounting and valuation principles.

None.

Material events after the closing date of the interim financial statements.

None.

Chur, 31. July 2015
