³⁾ adjusted for part-time positions, apprenticeships at 50 %

⁴⁾ Basis: profit before allocation to reserves without minority interests

GKB consolidated accounts 2015: much better than expected.

Alois Vinzens CEO

Peter Fanconi

Graubündner Kantonalbank posted an excellent result despite difficult conditions. The systematic pursuit of its chosen strategy and effective risk management proved successful. The good 2015 result reflects the excellent staff performance and GKB's great solidarity with its home market of Graubünden. Building on this, the Bank is able to reposition itself and adapt its services to evolving client needs, with the focus falling on digitisation. As Graubündner Kantonalbank has substantially more capital than required by supervisory legislation, it can maintain its stability and security even during an economic slowdown.

Loans to clients: strong growth of +8.3% supported by one-off factors

The increase in loans to clients of CHF 1,342.0 million (+8.3%) is explained by one-off factors rather than a change in risk policy. Cash Management granted short-term client loans to public-sector entities of CHF 400 million. First-class mortgages granted to clients in other cantons contributed 3.1% to the growth posted for mortgages (+6.3%).

Client assets: just over CHF 30 billion

Client assets (-0.3%) contracted slightly to CHF 30.1 billion. Currency-related effects and the outflow of foreign client assets were compensated by the growth posted for domestic clients.

Net interest income: negative interest rate environment is a strain

Income from interest-earning operations (CHF 230.4 million) declined by -2.3% under pressure of negative money and capital market rates. Thanks to the good risk result, interest income was reduced only

Graubündner Kantonalbank did substantially better than expected after the introduction of negative interest rates, generating an encouraging result again for the 2015 financial year. Group profit rose by +4.4% to CHF 168.2 million. The canton and participation capital holders will profit from an unchanged dividend distribution of CHF 95.0 million.

slightly by value adjustments of CHF 0.4 million. At 0.27%, the percentage of non-performing loans is still at a historically low level. The surplus of current balance sheet hedges caused by negative interest rates burdened the result. The reduction in income was offset to a large degree by the strong growth posted for loans and the development of mortgage interest rates.

Commission and trading business: foreign currency transactions

Net fee and commission income declined by -5.6% to CHF 106.0 million. The loss of attractive foreign investment portfolios and reduced income from retrocessions could not be compensated. The return to a EUR/CHF market exchange rate resulted in a substantial increase in foreign currency transactions, which had a positive effect on trading income (+7.7%).

Operating expenses: compensation for Cantonal guarantee included

Operating expenses contracted by -1.3 % or CHF -2.2 million. The prior-year result included one-off components of CHF 2.8 million resulting from the restructuring of the employee pension fund foundation. Higher project volumes (investments) led to an increase in administrative expenses. Current costs were reduced. Under the new accounting guidelines, the compensation for the state guarantee (CHF 2.8 million / +5.1%) is now charged to operating expenses. The cost/income ratio II weakened slightly to 50.2% (+0.7 percentage points) as a result of the decline in earnings.

Operating result of CHF 179.1 million

The operating result is reported as CHF 179.1 million (-3.9%). Lower depreciation and amortisation, cost measures and a better risk result could not completely offset the decline in interest and commission income.

Group profit: substantial increase of +4.4%

The Group profit after the allocation to the reserve for general banking risks was up by +4.4% to CHF 168.2 million. In the first half, the Bank realised a gain on the sale of its investment in Swisscanto of CHF 16.8 million. This gain did not have any impact on the Group result as it was taken directly to the reserve for general banking risks and will be used for planned investments in future projects.

Equity base: excellent core capital ratio of 18.7%

GKB's goal is to positively differentiate itself in the market with an above-average equity base. The weighted capital ratio is 18.7% (CET1 ratio) and consists entirely of common equity. Compared to the ratio of 12.8% required by the supervisory authorities, the Bank has large capital reserves.

Dividend: CHF 99.8 million for Canton, participation capital holders and public

Given the good result, the same dividend of CHF 38 will be paid out. The payout ratio is 50.6% for the parent company and falls within the targeted range of 50 to 60%. A total dividend of CHF 95.0 million will be paid to the Canton of Graubünden and the participation capital holders. CHF 2.0 million was again allocated to the contributory fund for non-commercial cultural, charitable, sport, business, tourism and social projects. The Canton of Graubünden will receive CHF 82.9 million (including payment for the Cantonal guarantee), an increase of CHF 0.2 million on the previous year.

Outlook for 2016: stable Group profit expected

In spite of the challenging environment, the Graubündner Kantonalbank expects the Group to earn a stable profit. As the difficult economic environment is increasing the credit risks, the operating result is expected to drop to CHF 170 to 175 million. This corresponds to a decline of 3 to 5%. The Bank therefore expects the earnings per share to fall to CHF 67 to 70. The Bank expects the lending business to grow to CHF 500 million in the current year. The inflow of net new money is budgeted at CHF 200 million.

Accounting and valuation principles.

Changes from 1 January 2015

The new Accounting Rules for Banks (ARB) came into effect on 1 January 2015, requiring changes in the structure of the balance sheet and classification within the income statement. Value adjustments are now accounted for under receivables in the balance sheet. Interest income (net) includes the change in value adjustments for credit risks, and operating expenses include the payment for the state guarantee. Instead of gross profit, the operating result is reported, which also includes the value adjustments and write-downs. The previous year's figures were restated in accordance with the new Accounting Rules for Banks.
